# **SECTION II**

# PROGRAM and SYSTEM OR EQUIPMENT CODES

(Item B12C)

#### Purpose

The DD Form 350 codes in this section have been developed to facilitate an analysis of DoD procurement by Major Defense Acquisition Program,\*system, or equipment item. However, if an end item or a component identifiable to an end item cannot be identified by a specific code, a request for a code, attached with the applicable DD Form 350, should be addressed to the appropriate organization specified in DoD FAR Supplement 253.204-70. Submission of the DD Form 350 will not be delayed pending resolution of the inquiry.

If a program, system, or equipment code is not applicable to a DD Form 350 transaction or bears a security classification prohibiting unclassified disclosure of the code title in combination with other DD Form 350 items, the code "000" (three zeros) shall be assigned.

#### Description and Use of Program Codes

#### **Ballistic Missile Defense Organization (BMDO)**

If a contracting action is funded by the BMDO, enter code CAA - Ballistic Missile Defense System.

## **Environmental Cleanup Programs**

Specific codes have been established to identify environmental cleanup programs in DD Form 350 transactions. These codes are to be used for all transactions involving environmental acquisitions. When a procurement is for supplies or services in support of environmental cleanup programs, the code for the program with the largest dollar value will be used. Where both a system code and a program code apply, use the program code. Acquisitions otherwise supporting environmental cleanup programs which are not allocable to a single program (i.e. DERP, BRAC, or Superfund) shall be coded ZOP, Other Environmental Programs.

Code Environmental Cleanup Program

- ZDE Defense Environmental and Restoration Program (DERP)
- ZBC Base Realignment and Closure (BRAC) Environmental Activities
- ZSE Environmental Protection Agency Superfund
- ZOP Other Environmental Programs

### Description and Use of System or Equipment Codes

The code for Item B12C consists of three alphabetical positions.

The first position identifies one of the following major categories of equipment:

- A Aircraft
- B Aircraft Engines
- C Missiles & Rockets
- D Vehicles
- E Weapons
- F Ammunition
- G Electronics
- H Other Equipment
- S Ships

The second position identifies a subdivision of the major category, e.g., trainer aircraft, while the third position identifies the specific item, e.g., an F-111.

Normally, each system or equipment code includes all subsystems, components, repairs and repair parts, modifications, and related supplies and services (other than RDT&E and construction) which are procured specifically for the system or equipment. Exceptions to this rule are those instances where a specific equipment item or a major component has been assigned a separate code, e.g., J-52 Turbojet Aircraft Engines.

When a procurement is for components, parts, or services covering more than one system or equipment and 75 percent or more of the dollar amount is allocable to a single system or equipment, the code for that system or equipment shall be assigned. Otherwise, multi-system procurement shall not be assigned a specific code.

Each department should use only that part of Section II designated for its use, e.g., Part A for Army, Part B for Navy, and Part C for Air Force. The arrangement of systems or equipment by major category is as follows:

- 1. Aircraft are arranged by design number within each basic mission symbol, e.g., A-4, A-5, A-6, and F-4.
- 2. Aircraft engines are arranged by design number within type of engine.

- 3. Missiles and rockets are arranged by design number.
- 4. Air Force electronics and communications items are arranged numerically by system number.
- 5. All other categories are arranged alphabetically by key word or words and by caliber size.

If an aircraft, missile, or rocket reported on DD Form 350 does not have a mission symbol or letter prefix listed in this manual, but does have a design number that is listed, the code applicable to that design number should be assigned. For example, an RB-52 aircraft would be assigned the code for a

B-52. In addition, the series symbol for an item is not used, e.g., F-111 is used rather than F-111A or F-111B.

\*The Major Defense Acquistion Programs are defined by the Criteria in Section 2430, Title 10 of the U.S. Code
